DETAILED ACTION

This is a response to the Applicants' amendment submitted on 11/12/2004. In virtue of this amendment, claims 1-35 remain active in the instant application.

Allowable Subject Matter

1. Claims 1-35 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or fairly suggest:

- An automatic exterior light control comprising a controller configured to generate an exterior light control signal; said controller is further configured to generate a predetermined rate of change of the exterior light control signal over a predetermined time that is a function of at least one variables selected from a group comprising: a current inclination angle of a headlight, an estimated range of an oncoming vehicle, an estimated range of a leading vehicle and an ambient light level, in combination with the remaining claimed limitations as called for in independent claim 1 (claims 2-4 are allowed since they are dependent on claim 1);
- An automatic exterior light control comprising a controller; said controller is configured to generate an exterior light control signal as a function of said controlled vehicle illumination range and said at least one other vehicle, in combination with the remaining claimed limitations as called for in independent claim 5 (claims 6-15 are allowed since they are dependent on claim 5);

- An automatic exterior light control comprising a controller; said controller is configured to generate an exterior light control signal as a function of said controlled vehicle illumination range, in combination with the remaining claimed limitations as called for in independent claim 16 (claims 17-24 are allowed since they are dependent on claim 16);
- An automatic exterior light control comprising a controller; said controller is configured to generate a continuously variable exterior light control signal; said controller is further configured to automatically calibrate said aim of said image array sensor relative to a controlled vehicle as a function of said at least one detected image, in combination with the remaining claimed limitations as called for in independent claim 25 (claims 26-27 are allowed since they are dependent on claim 25);
- An automatic exterior light control comprising a controller configured to generate an exterior light control signal; said controller is further configured to generate a predetermined rate of change of said exterior light control signal over a predetermined time period that is a function of a brightness of at least one detected light source, in combination with the remaining claimed limitations as called for in independent claim 28 (claims 29-31 are allowed since they are dependent on claim 28); and
- An automatic exterior light control comprising a controller configured to generate an exterior light control signal; said controller is further configured to generate a predetermined rate of change of said exterior light control signal over a
